NC STATE UNIVERSITY

December 2016 Future Plans Survey All Respondents: Overview

This overview report presents findings from all graduating seniors participating in the December 2016 Future Plans Survey. Additional reports on the survey methods and analysis, college results, and departmental summaries, as well as a copy of the questionnaire, can be found online.

Plans Following Graduation

As of the time they completed the survey, over 80 percent of students graduating in December 2016 said they would exclusively be employed or pursuing employment after graduation, and about half said they had already secured some type of employment. Thirty-five percent of respondents indicated that they had accepted a position that would begin after graduation, while 11 percent said they would continue working in a job they had prior to graduation (10.7%), and about four percent said they would either be working as an intern (2.2%), starting their own business (1.0%), doing paid volunteer work (0.7%), or serving in the military (0.4%).

Over one-quarter of the graduates said they were actively seeking employment but had not yet found a position (27.2%), and three percent said they had not yet begun their search, but were planning to seek employment within the year (3.1%).

Finally, about 17 percent of respondents indicated that they were planning on going to graduate/professional school as their primary activity in the year after their graduation (10.9%) or going to graduate/professional school and working (6.0%).

Table 1: Plans Following Graduation

	N	%
Have accepted position that will begin after graduation	238	35.0
Will continue working in job I had prior to graduation	73	10.7
Have started/will be starting my own business	7	1.0
Will be working as an intern	15	2.2
Currently seeking employment	185	27.2
Have not begun to seek employment, will begin within year	21	3.1
Going to grad/prof school within the year	74	10.9
Going to grad/prof school and working	41	6.0
Taking additional undergraduate coursework	3	0.4
Military service	3	0.4
Volunteer activity	5	0.7
Starting/raising a family	4	0.6
Don't know yet	5	0.7
Other	6	0.9

Post-Graduation Employment

This section of the report provides detailed information specifically on those students who indicated they had obtained a full-time position, followed by information provided by those who said they were actively seeking employment but had not yet found a position. Finally, this section contains a brief look at those few respondents who said they had not yet begun their job search but would do so in the coming year.

Full-Time Employment

The majority of respondents who said they had secured employment after graduation indicated they would be working full-time (89.8%).

Table 2: Full- or Part-Time Employment (among those securing any type of employment)

	Z	%
Full-time	316	89.8
Part-time	36	10.2

Number of Job Interviews and Job Offers

Just under half of the students having secured a full-time position reported that they had been on interviews for one (24.4%) or two (24.1%) different positions during their most recent job search, and 41 percent of the graduates indicated having gone on three or more interviews (40.6%), with 14 percent having gone on interviews for five or more positions before accepting an offer (14.5%). Eleven percent of graduates obtaining a full-time position indicated they did not go on any interviews in their most recent job search (10.9%).

Just over half of the students having secured a full-time position indicated that the position they accepted had been their only job offer (51.9%), while nearly 40 percent of respondents said that they had received one (22.7%) or two job offers (15.3%) in addition to the one they accepted. The remaining 10 percent of respondents indicated that they had three or more additional job offers from which to choose (10.2%).

Table 3: Number of Positions Interviewed For (full-time employees only)

	N	%
None	33	10.9
One	74	24.4
Two	73	24.1
Three	54	17.8
Four	25	8.3
Five or more	44	14.5

Table 4: Number of Job Offers (full-time employees only)

	Z	%
Only job offer	153	51.9
One additional job offer	67	22.7
Two additional job offers	45	15.3
Three or more additional job offers	30	10.2

Employers

Graduates securing full-time employment were asked the name of the organization for which they would be working after graduation. Although NC State graduates accepted jobs in many different companies and organizations, those hiring the greatest number of NC State December graduates were Cisco, International Paper, NC State University, and IBM.

A complete list of the companies/organizations where graduates will be working full-time can be found in Appendix A.

Industry and Occupation

About 80 percent of the graduates with full-time employment indicated that they would be working in a private, for profit business or organization (78.4%), with an additional 17 percent reporting they would be working for the federal, state, or local government (12.9%) or in academia (4.5%). The remaining four percent reported that they will be working in a private, non-profit business or organization (1.9%) or were self-employed (2.3%).

Table 5: Type of Employment (full-time employees only)

	N	%
Academic	14	4.5
Federal, state, or local government	40	12.9
Private, for profit business or organization	243	78.4
Private, not for profit business or organization	6	1.9
Self-employed	7	2.3

Students having obtained full-time employment were asked to select the type of industry and the occupational classification of the job in which they would be working from a list of industries and occupations. Although the graduates are heading into a wide range of industries, the most common industries in which they report they will be working are *engineering* (15.5%), *computer software/hardware* (8.1%), and *manufacturing* (7.1%). Those finding full-time employment were most likely to say they would have a job function related to *engineering* (22.1%), followed *software development* (7.8%) and *accounting* (5.2%).

Relationship of Job to Academic Major and Satisfaction with Job

Two-thirds of those with full-time employment said their job was "directly related" to their academic major (67.7%) and just seven percent said it was "not at all related" (7.1%). The vast majority of those obtaining full-time employment said they were "very satisfied" (56.1%) or "satisfied" (33.9%) with the job in which they will be working. Interestingly, those who said they will be working in a position "directly related" and those few who will be working in a job "not at all related" to their major were both more likely to be "very satisfied" (64.3% and 59.1%, respectively) than those who said their job was only "somewhat related" to their major (33.3%). However, those who said their job was "not at all related" to their major were also more likely than others to say they were "dissatisfied" with their job (4.5%). In no case did a respondent indicate being "very dissatisfied" with their job.

Table 8: Relationship of Job to Major and Satisfaction with Job (full-time employees only)

	_		Satisfaction w/ job				
	All	Very Satisfied	Satisfied	Neutral	Dissatisfied	Very Dissatisfied	All

Job Location

While NC State graduates will be employed across the nation, in addition to a few working in other countries, three-fourths of those students having accepted a full-time job say they will be staying in North Carolina (74.7%), with over half (55.2%) working in the Research Triangle area (e.g., Raleigh, Durham, Chapel Hill).

A complete list of the states and countries where graduates will be working can be found in Appendix B.

Table 9: Job Location (Top Five States of Employment; full-time employees only)

	Ν	%
North Carolina	230	74.7
Georgia	9	2.9
Virginia	7	2.3
South Carolina	7	2.3
Texas	6	2.0

	Z	%
Triangle	160	55.2
Other N.C.	60	20.7
In U.S. outside N.C.	66	22.8
Outside U.S.	4	1.4

^{*}Some respondents staying in North Carolina did not provide the name of the city which they would be working and therefore region could not be determined.

Compensation

Students with full-time positions were asked to indicate the different ways in which they would be compensated. A large majority of respondents said they would be getting paid a salary (76.3%), and a significant portion said their income would include hourly wages (19.9%), and/or performance bonuses (12.3%). An additional five percent of respondents said they would be receiving compensation via commission (4.7%) and/or tips/gratuities (0.6%).

Further analysis shows that graduates are being compensated through a variety of methods. For example, while more than half of respondents said they would be receiving only a salary (59.4%) and 17 percent said they would be exclusively receiving hourly wages (16.9%), 17 percent reported receiving a salary in combination with one or more other forms of compensation (e.g., performance bonuses, commission, and/or hourly wages; 17.1%).

Table 11: Type of Compensation (full-time employees only)*

	Ν	%
Salary	241	76.3

One-Time Compensation: Signing Bonuses and Relocation Packages

More than one-quarter of respondents with full-time employment said they had received a signing bonus (28.4%). Close to half of those receiving a bonus said it was for \$5,000 or more (49.4%), with 10 percent saying it was for \$10,000 or more (10.1%).

Table 14: Signing Bonus (full-time employees only)

When asked if they were offered a relocation package, over one-third of the students with full-time jobs said that such a package was "not applicable" (38.3%). However, about 22 percent of those with full-time employment said they were offered a relocation package (22.4%). Offers of relocation packages, not surprisingly, were related to whether or not the employee would be working in North Carolina – over 60 percent of those who said they were working outside of North Carolina received a relocation package (61.4%), whereas just 28 percent of those who said they would be working in North Carolina but outside of the Triangle received a relocation package (28.3%).

Table 16: Relationship of Relocation Package and Region of Job (full-time employees only)

Outside NC	70	61.4%	37.1%	1.4%	24.1%
All	290	22.4%	39.3%	38.3%	100.0%

The Job Search

Over half of those with full-time employment reported starting their job search six or more months before graduation (52.7%), while just seven percent of those with full-time employment started looking for work less than three months before graduation (7.3%).

Table 17: When Started Looking for a Job (full-time employees only)

	N	%
12 or more months before graduation	66	21.9
9-11 months before graduation	18	6.0
6-8 months before graduation	75	24.8
3-5 months before graduation	121	40.1
1-2 months before graduation	17	5.6
Less than one month before graduation	5	1.7

Students were asked to indicate what resources had proven to be helpful in their job search. Those graduates with full-time employment were most likely to say that an *internship/externship* had been helpful (46.8%), followed by *attending a career fair at NC State* (30.7%) and *applying for a job via ePACK* (26.6%). Note that some resources may have in fact been helpful for those who used them, but have a smaller frequency overall because fewer students used that particular resource (e.g., student teaching experience).

Table 18: Helpful Resources (full-time employees only)*

	N	%
Internship/externship	148	46.8

^{*}Respondents could select more than one resource.

Seeking Employment

Over one-quarter of the December 2016 graduates responding to the Future Plans Survey indicated that as of the time they completed the survey, they were *currently seeking employment* (27.2%) and a small number (3.1%) reported they *have not yet begun to seek employment, but planned to do so within a year after graduation* (Table 1). This section of the report first looks at those who were actively seeking a job, and then briefly at those who had not yet begun their job search.

The Job Search

Over three-fourths of the students who said they were looking but had not yet found a job as of the time they completed the survey—typically within two weeks before or after graduation—said they first began looking for a job less than six months before graduation (78.0%). Forty-one percent said they started looking for a job three to five months before graduation (40.7%) and about one-fourth said they started looking one to two months prior to graduation (23.7%). Fourteen percent without a job said they began their search less than one month prior to graduation (13.6%).

Table 19: When Started Looking for a Job (among those seeking but not yet securing a job)

	Ν	%
12 or more months before graduation	5	2.8
9-11 months before graduation	4	2.3
6-8 months before graduation	30	16.9
3-5 months before graduation	72	40.7
1-2 months before graduation	42	23.7
Less than one month before graduation	24	13.6

Nearly 70 percent of graduates who said that they were currently seeking employment reported that they had an interview for at least one position during their most recent job search (68.5%), with one-third reporting having gone on interviews for three or more positions (33.7%).

Table 20: Number Of Positions Interviewed For (among those seeking but not yet securing a job)

	N	%
None	56	31.5
One	35	19.7
Two	27	15.2
Three	24	13.5
Four	18	10.1
Five or more	18	10.1

Notably, a number of December graduates who had been seeking but not yet found employment indicated that it was not due to a lack of offers. One-fifth said that they had received at least one job offer (19.6%), with five percent having received two or more offers (5.1%). These students were asked to briefly describe why the job offer(s) they had received had not worked out. The most common reasons given for not accepting a job offer include currently being in the process of negotiating or considering one or more job offers, the job not being a good fit for their interests or career goals, or dissatisfaction with the proposed compensation (e.g., salary too low).

Table 21: Number of Job Offers (among those seeking but not yet securing a job)

	N	%
None	144	80.4
One job offer	26	14.5
Two job offers	8	4.5
Three or more job offers	1	0.6

Type of Work Seeking

Eighty-seven percent of current job-seekers said they were looking for full-time work, with most of the remainder indicating they were looking for either full- or part-time work (10.8%). Almost all of those seeking employment said they were looking for a job either "directly related" (41.2%) or "somewhat related" (52.4%) to their major. The most common job functions students were hoping to be employed doing were related to *engineering* (14.9%), *environment/conservation* (5.2%) and *marketing* (5.2%).

Location of Job Seeking

About one-third of those still looking for a job at the time of the survey said they were only looking for employment in North Carolina (31.9%). Just over 40 percent said they were looking for a job in somewhere in the U.S. states including but not limited to North Carolina (39.5%), or in other U.S. states not including North Carolina (2.7%). One-quarter of the job-seekers indicated they were both inside and outside of the U.S. for employment (24.3%).

Table 25: Looking for Employment Inside or Outside the U.S.

Inside and outside the U.S.	45	24.3
Outside U.S. only	3	1.6

Future Job Seekers

Just three percent of December 2016 graduates said that while they had not yet begun their search for employment, their primary activity after graduation would be to find a job (3.1%; Table 1). When asked when they planned to begin their job search, the majority of the small number of respondents who had not yet begun their job search said they would begin within one month of graduation.

Table 26: When Will Begin Job Search

_	N	%
Within the next couple of weeks	7	36.8

Within 2-3 months after graduation	3	15.8
Within 4-6 months after graduation	0	0.0
Within 6-12 months after graduation	0	0.0
Not for at least a year	0	0.0

Further Education

This section of the report provides detailed information on further education being pursued by NC State December graduates. About 17 percent of the 680 graduates who submitted the Future Plans Survey said they planned on going to graduate or professional school in the coming year (Table 1).

Students planning on attending graduate/professional school were asked to indicate from a list of options the reasons why they had decided to pursue post-graduate education. The most common reasons cited were their chosen career field requires graduate/professional school (68.7%), to be able to earn a higher salary with an advanced degree (65.2%), and to enhance professional knowledge in a particular subject area (66.1%). Five percent indicated that being unable to find a job was a reason for attending graduate/professional school (5.2%).

Table 27: Reasons for Attending Graduate/Professional School*

	Ν	%
My chosen career field requires graduate/professional school	79	68.7
I will be able to earn a higher salary with an advanced degree	76	66.1
I want to enhance my knowledge in a particular subject area	75	65.2
I want to improve my marketability	51	44.3
I have been unable to find a job	6	5.2
My employer is encouraging me to attend	3	2.6
Other	6	5.2

^{*}Respondents could select more than one reason.

Current Status for Graduate/Professional School Attendance

Of the December 2016 graduates planning on attending graduate/professional school, about one-quarter said they have been accepted and know where they will be going (23.5%) and an additional six percent reporting that they have been accepted but are still undecided on whether or not or where they will actually attend (6.1%). Thirty-one percent said they have applied, but have not yet been accepted (31.3%). Finally, about 40 percent responded that they have not yet applied, but plan to do so within the next year (39.1%).

The remainder of this section reports on only those who indicated they have been accepted and definitely know where they will be attending graduate/professional school.

Table 28: Current Status for Graduate/Professional School Attendance

	N	%
Have been accepted and know where I'm going	27	23.5
Have been accepted but undecided	7	6.1
Have applied, but not yet been accepted	36	31.3
Have not applied but plan to do so within the next year	45	39.1

School Attending

The vast majority of the respondents who at the time of the survey knew where they would be attending graduate/professional school said they will be staying in North Carolina (88.9%), with two-thirds attending NC State University (66.7%). Over 90 percent of those going on to graduate/professional school say they will be attending their first-choice school (92.6%).

Degree Seeking

Students attending a specific graduate/professional school in the coming year were asked in what degree program they will be enrolled. About three-fourths of students said they would be in a Master's program (77.8%). Four students indicated that they would be pursuing a Professional degree, while one respondent said he or she would be enrolling in a Doctoral program (i.e., a PhD). Finally, one student said she or he would be enrolling in some other type of degree program (i.e., a BSN).

Other assistantship	1	3.7

^{*}Respondents could select more than one type of funding/award.

NC State Experiences and Resources

All graduating seniors participating in the Future Plans Survey were asked about their participation in various work-related experiences, as well as about various career-related resources they might have used while at NC State. This section of the report summarizes the information they shared about these experiences.

Work-Related Experiences

Respondents were asked whether or not they had participated in various work-related experiences while a student at NC State, and if so, for how many semesters/summers they did an activity, and whether or not it was helpful in securing a job offer. Two-thirds of the students reported having had an internship/externship or job in their field of study (66.6%). About one-fifth of students reported participating in a class project specifically designed to work with a company/organization outside of NC State (22.4%), and/or on a research project with a faculty member (19.4%).

A sizeable number of graduates reported having long-term work-related experiences through internships/externships or job related to major and research with faculty, with such experiences taking

place for three or more semesters/summers (39.1% and 37.0% respectively). While relatively fewer students had a co-op experience, such experiences were most likely to be long-term, with 63 percent of those having done a co-op doing so for three or more semesters (63.4%). Most likely to be short-term experiences were *practicums*, *class projects*, and *student teaching*.

Table 38: Participation in Work-Related Experiences*

	Had Exp	erience	# of Semesters/Summers							
	N % I		Less than one	1	2	3	4+			
Со-ор	63	9.4%	0.0%	14.3%	22.2%	44.4%	19.0%			
Internship/externship or job in field	447	66.6%	2.0%	33.9%	24.9%	20.2%	18.9%			
Practicum	28	4.2%	17.9%	71.4%	10.7%	0.0%	0.0%			
Student teaching	44	6.6%	4.5%	54.5%	25.0%	6.8%	9.1%			
Research w/ faculty	130	19.4%	3.1%	34.6%	25.4%	18.5%	18.5%			
Class project	150	22.4%	12.8%	53.0%	27.5%	3.4%	3.4%			

^{*}Respondents could select more than one experience.

For the most part, regardless of the type of work-related experience, students who were interested in finding employment were very positive about the helpfulness of the experience in securing a job offer. *Co-ops* and *internships/jobs related to major* were most likely to be viewed as "very helpful" (66.1% and 62.5%, respectively). Although the majority viewed it as a helpful experience, *practicums* and *class projects* working with outside companies/organizations were more likely than other work-related experiences to be viewed as "not very helpful" or "not at all helpful" in securing employment (39.1% and 29.1%, respectively). Those who were not seeking employment (e.g., because they were continuing their education or have some other plans following graduation) were given the option to select "not applicable" when asked about the helpfulness of the work-related experience. In Table 39, responses of "not applicable" have been excluded.

Table 39: Helpfulness of Work Experiences in Securing Employment (among those having had the experience and having looked for employment)

Career Service Offices

Graduating seniors were asked if they had ever used the different career service offices on campus, and if so, how frequently they had used them and how they would rate the services provided. Among respondents overall, about 46 percent of graduates reported having <u>never</u> used any of the career centers asked about (45.8%). Use of career centers asked about, however, varied widely by college. For example, those in the College of Textiles were by far the most likely to report having used a career center, with 86 percent having gone to at least one of the centers asked about (85.7%). In comparison, none of the nine seniors in the College of Education who had participated in the survey had ever used one of the career centers asked about.

Not surprisingly, use of the specific career centers was strongly related to the college to which a student belonged, with students being most likely to have gone to the career service office in their own college when available. In addition, college career services offices typically attracted few students from outside their own college. Among survey respondents, 86 percent of the students in the College of Textiles reported going to the College of Textiles Career Services office (85.7%) and close to two-third of those in the Poole College of Management used their own career services office (64.6%). In contrast, just under half of students in CALS reported using their own career services office (48.2%). The Career Development Center was most likely to be used by those without such services in their own college, such as in the College of Engineering (59.2%), the College of Humanities and Social Sciences (42.1%), and the College of Sciences (35.4%).

^{*}Respondents could select more than one career service office.

Among those using a career services office, those going to the career services office in the College of Textiles were by far most likely to go frequently, with over 60 percent saying they went "on a regular basis" (44.4%) or that they had gone "many times" (16.7%). Thus, most students in the College of Textiles take advantage of their career services office, and many do so frequently.

Table 41: Frequency of Use of Career Service Offices (among those ever having used the office)

	4: On a regular basis	3: Many times	2: Several times	1: Just once or twice	N
Career Development Center	3.3%	6.6%	33.9%	56.1%	271
CALS Career Services	3.4%	1.7%	29.3%	65.5%	58
College of Textiles Career Services	44.4%	16.7%	27.8%	11.1%	18
College of Design Career Services	0.0%	25.0%	50.0%	25.0%	4
Poole COM Career Development Center	2.8%	9.7%	40.3%	47.2%	72

Graduating seniors were also asked to evaluate the services provided by the career services offices they had used. Ratings were largely positive—career services offices were most often rated "excellent" or "good." The four respondents reporting having ever used the College of Design Career Services office all rated the services provided as "excellent." All those rating the College of Textiles career services office rated the services as "excellent" (72.2%) or "good" (27.8%). In no case did more than a small number of users rate the services of any given center as "poor" or "very poor."

Career Services and Fairs

Students were asked whether or not they had used specific career-related services. Overall, a majority of students indicated that they had taken advantage of *ePACK*, the Career Development Center's online tool for connecting students with potential employers (71.5%) or that they had attended a career fair (either on or off campus) (62.9%). Over 30 percent said they had attended presentations about resume writing, interviewing, and other skills (33.4%) or employer information sessions (31.4%).

Table 43 shows differences in career resources used based on whether a student indicated that they planned on joining the workforce or going on to graduate/professional school after graduation. About three-quarters of students who had either accepted a job or were looking or planning to look for employment had used *ePACK* (73.6%), while about 64 percent of those planning on attending graduate/professional school reported having done the same (64.4%). Similarly, graduates pursuing employment were more than twice as likely to have participated in *on-campus interviews* compared to those pursuing further education (29.5% vs. 13.5%). Those planning on employment were also slightly more likely than those planning on continuing their education to have *attended career fairs* (64.7% vs. 60.6%), *attended employer information sessions* (33.2% vs. 25.0%), *visited the NC State Career Development Center website* (30.6% vs. 26.0%), and participated in *mock interviews with a career counselor/coach* (11.8% vs 7.7%). In contrast, both those planning on entering the workforce and those planning on continuing their education were equally likely to have *attended presentations about resume writing, interviewing, and other skills* and to *have spoken with a career counselor/coach*.

Table 43: Resources Used at NC State*

	NCSU	Accepted Job/Seeking Work/Planning to Look for Work	Attending/Planning to Attend Grad School
ePACK	71.5%	73.6%	64.4%
Attended career fair	62.9%	64.7%	60.6%
Presentations on resume writing, interviewing skills, etc	33.4%	33.9%	32.7%
Attended employer info sessions	31.4%	33.2%	25.0%
Visited NC State Career Development Center website	29.7%	30.6%	26.0%
On-campus interviewing	26.5%	29.5%	13.5%
Joined professional society at NCSU related to career field	24.0%	24.4%	22.1%
Spoke w/ Career Counselor/Coach	21.2%	21.5%	21.2%
Mock interviews w/ Career Counselor/Coach	10.9%	11.8%	7.7%
Total (N)	671	549	104

^{*}Respondents could select more than one resource.

Students who said they had attended a career fair were asked which career fair(s) they had attended. Among the two-thirds of respondents who said they had attended a career fair, either on or off campus, students were most likely to report attending the *Engineering Career Fair* (46.7%), followed by the *PCOM Career and Internship Fair* (21.6%).

Looking at career fair attendance by the college from which a student graduated is informative. Eighty-six percent of students in the College of Engineering attended a career fair (85.6%), with almost all of those participating in the *Engineering Career Fair* (96.6%). Similarly, over 80 percent of those in the College of Textiles attended a career fair (81.0%), and all of those who had gone to a career fair went to the fair affiliated with their college.

Overall, the Engineering Career fair attracted the widest breadth of students (i.e., many students from different colleges). Students in the College of Humanities and Social Sciences had the most number of students taking advantage of the broadest range of career fairs.

^{*}Respondents could select more than one career fair.

Closing Comments

The Future Plans Survey closed by asking respondents to rate their overall satisfaction with the career guidance they had received from their department and/or college while at NC State, and to reflect on how they are feeling about their future. The majority of December 2016 graduates said they were either "very satisfied" (25.6%) or "satisfied" (43.2%) with the career guidance they received from their academic department/college. While about one-fourth said they were "neutral" about the

guidance they received (24.2%), only seven percent said they were either "dissatisfied" (4.8%) or "very dissatisfied" (2.3%) with the career guidance they received.

Overall, the December 2016 graduates are excited about their futures. When asked which statement comes closest to how they were feeling about their future, over 80 percent of respondents said that they were either "very excited" (43.8%) or "excited" (40.2%). A smaller percentage of respondents chose "a bit confused/uncertain - I'm not really sure what I want to do at this time" (13.1%), and just three percent (3.0%) selected the last option of "very confused/uncertain - I don't know what I want to do at this time."

Most December 2016 graduates also feel prepared for their futures. Asked about how prepared they felt for their future career paths, 90 percent of respondents said that they felt either "very prepared" (45.1%) or "somewhat prepared" (44.8%) for their future career paths. Just three percent of respondents said they felt "very unprepared" (2.6%).
