

## **May 2019 Undergraduate Future Plans Survey Introduction, Research Methods, and Response Rates**

This series of reports presents findings from the May 2019 Undergraduate Future Plans Survey (UFPS) conducted at NC State University. The survey is designed to collect specific information on students' plans following graduation, including detailed information on employment, graduate/professional school attendance, and participation in career-preparation activities while at NC State. This introductory report provides a brief history of the project and an overview of the research methods. Additional reports can be found on the [OIRP website](#).

### **Survey Background**

Historically, the Career Development Center (CDC) and the college career service offices used various means to collect information from NC State's seniors on their 'future plans' at the time of their graduation. While these diverse strategies provided useful information for some units, without a systematic, centralized process for collecting information, it was difficult to get a good picture of the future plans for NC State graduates as a whole. In addition, centralizing the project in the Office of Institutional Research and Planning (OIRP) provided a more efficient and cost-effective mechanism for both administering the survey and providing reports on the results. To accomplish these objectives, OIRP developed and administered the pilot Undergraduate Future Plans Survey in December 2010, working with the CDC and the college career service offices to develop an overall research design and questionnaire that would meet the needs of individual units on campus as well as that of the University as a whole. The survey has been administered semiannually by OIRP since then.

### **Research Design**

The Undergraduate Future Plans Survey is administered semiannually, coinciding with December and May graduation. In addition, OIRP administers a modified version of the survey in early Fall semester as a follow-up to the December and May surveys for the previous academic year. Specifically, the "Survey of Recent Graduates" is geared towards December/May survey respondents who said they were intending on finding full-time employment but had not done so by the time they completed the survey and/or who said they were planning to attend graduate/professional school but not had yet confirmed whether or not or where they would be attending, as well as to those who had said they were uncertain of their plans. Those who did not participate in the December/May Undergraduate Future Plans Survey, or who graduated in the summer, are also invited to participate in the follow-up Survey of Recent Graduates.

OIRP is solely responsible for preparing the survey for online administration, identifying the survey population and sending email invitations and reminders about the survey to students as appropriate, collecting and analyzing the data, and preparing and distributing reports on results.

All undergraduate students who have applied to graduate as of the day prior to graduation day are asked to participate in the UFPS. The online survey goes live about two weeks prior to

graduation day, and is scheduled to close two to four weeks after graduation. The May 2019 Undergraduate Future Plans Survey was in the field from April 30, 2019, through May 29, 2019, with commencement being held on May 11.

On April 30, all students who as of that day had applied to graduate in May were sent an email from their college Dean inviting them to participate in the survey. The first follow-up reminder email was sent to non-respondents from their college Associate Dean on May 6. On May 10, the second reminder email came from the Executive Director of the Career Development Center for students in a college without its own career services office, and from the director of the student's college career services office (or equivalent) if their college did have such an office. The final three reminders came from the Director for Survey Research on May 21, May 23, and May 29. On each of the days that reminders were sent to non-respondents, invitations were emailed to those who had applied to graduate during the intervening period. Drafts of the invitation and five follow-up emails are available in Appendix A. In addition to the emails sent by OIRP, OIRP encouraged various administrators in the colleges and departments (e.g., Associate Deans for Undergraduate Programs, College and Department Coordinators for Advising) to contact their students directly. Some students, therefore, might have received additional requests to participate in the survey.

Incentives were offered to encourage participation in the survey. Eight respondents who completed the survey by midnight on graduation day (May 11) were randomly selected to each receive a \$25 Amazon eGift Card. In addition, one respondent who submitted the survey by the final deadline of May 29 was randomly selected to receive a \$100 Amazon eGift Card.

## **Response Rates**

The final May 2019 UFPS population consists of the 3,551 undergraduate students who had applied to graduate and were conferred degrees as of May 11. Of these students, 2,031 participated in the Undergraduate Future Plans Survey for an overall response rate of 57.2 percent. Participation in the survey however, varied by college, ranging from a high of 75.5 percent in the College of Design to a low of 51.6 percent in the Poole College of Management. The College of Engineering is slightly overrepresented in the overall results, with their graduates making up 27.1 percent of the May 2019 population and 29.5 percent of the survey respondents.

**Table 1: Response Rate, Overall and by College**
